ABOUT ME

Third-year Software Engineering student with experience in developing and deploying web applications, building RESTful APIs, and working with relational databases. Proficient in collaborative software development using version control tools such as Git and GitLab. Highly motivated to expand technical knowledge, strengthen software development skills, and gain hands-on experience in real-world software engineering environments.

PROJECTS

Easy Cook – Online Recipe Collection Platform	Year 2, Semester 2
• Role: Full-Stack Developer • Tech Stack: TypeScript, Nuxt.js, SQL, Hono, Cloudflare D1, Docker • Developed a recipe management web application with CRUD functionality. • Developed RESTful APIs using Hono with structured routing and modular architecture. • Integrated Cloudflare D1 as a relational database for storing recipe and user data. • Implemented authentication and protected routes for access control. • Developed a responsive user interface using Nuxt.js and component-based architecture. • Used Docker to provide a consistent development and deployment environment.	
EasyClassPay – Online Class Payment Management System	Year 2, Semester 1
• Role: Full-Stack Developer • Tech Stack: JavaScript, Vue.js, Express.js, MySQL • Developed a web application for managing class fee payments and related records. • Developed RESTful APIs for managing payment, class, and user data. • Integrated MySQL for relational data storage and database operations. • Implemented authentication and role-based access control. • Designed and executed test cases based on system requirements. • Applied Agile/Scrum practices for task planning, collaboration, and project tracking.	
POS - Mormilk cafe	Year 1, Semester 2
• Role: Frontend Developer • Tech Stack : JavaScript, HTML, CSS • Designed and implemented responsive UI layouts for the POS system • Created Use Case Diagram and system documentation • Developed frontend interface	

EDUCATION

University of Phayao	2024 - Present
Bachelor of Engineering in Software Engineering	

SKILLS

Programming Languages: Java, JavaScript, TypeScript, Python, SQL
Framework: Next.js, Vue.js, Nuxt.js, Hono.js, Express.js
Database: Cloudflare D1, Supabase, MySQL
DevOps: GitLab, Docker, Vercel
Tools: Vscode, Figma, Jira, Miro, Github
AI: Antigravity
